

IN THE SPECIFICATION

Please amend the title as follows:

122 RETHERMALIZATION SYSTEM AND METHOD FOR USE WITH FOOD
TRAYS HAVING A HOT FOOD SIDE AND A COLD FOOD SIDE

Applicant has submitted a replacement Abstract as requested. Pursuant to 37 CFR 1.72, the replacement abstract is submitted on a separate sheet and appended hereto.

Please amend the paragraph on page 14 (lines 10-15) as follows:

123 Returning to FIG. 2 and with reference to FIGS. 5 and 6, the heating system 52 preferably includes a pair of electrical heating sources 130 and 132 located adjacent the inner sidewall of the compartment 28. Each source 130 and 132 preferably extends substantially the height of the compartment 28. The heating sources 130 and 132 are preferably tubular metal sheathed ~~incoloy~~ resistance heaters having a digital temperature controller, with the metal sheath material preferably being made of a corrosion resistant metal alloy such as nickel alloys of the type available under the trade name INCOLOY.
